

Greetings FCC:

I just shake my head when I hear you are trying to stop "locally oriented" content, including the new XM Instant Traffic & Weather channels.

Can't you find anything better to do with your time and our money.

As a 3-year subscriber to XM radio, I pay for their services each month and expect nothing but the best. And that's what I'm getting. But if there's something I don't like on it, just like TV, I'll change the channel.

But for lobbyists and campaign contributors stress over such a subject is appauling.

Please leave the private industry of Satellite Radio alone. We all love it just the way it is!

Thank You,
